THE SCHOOLING RESOURCE STANDARD (SRS) FUNDING MODEL

The current needs based funding model for schools comprises base funding plus loadings to address educational disadvantage. Base funding is adjusted according to the school community's estimated capacity to contribute (CTC) to the costs of education assessed on parental income tax data.

This methodology is known as the Direct Measure of Income (DMI). Schools with a higher parental income receive less per capita base funding. All loadings are fully publicly funded.

The loadings in the SRS model are for:

SCHOOL SIZE

SOCIO-EDUCATIONAL DISADVANTAGE

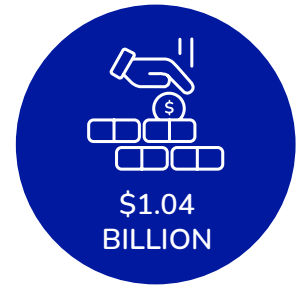

INDIGENITY

LOW ENGLISH LANGUAGE PROFICIENCY

STUDENTS WITH DISABILITY

SOURCES OF INCOME

On average parents and communities provide 89% of capital funding.

CAPITAL FUNDING

CAPITAL GRANTS PROGRAM

In 2020, it is estimated that grants for capital works for the Independent sector will total approximately \$67 million. Grants are distributed on a needs basis through Block Grant Authorities, with priority given to disadvantaged school communities with the least capacity to raise funds.

STATE AND TERRITORY CAPITAL FUNDING

State and territory government assistance for capital funding is limited. Several state and territory governments also provide interest subsidy arrangements.
