PURPOSE

1

This report provides an easy reference to trends in key parameters and relevant school-based data to provide a picture of the economic environment in Australia. The information is provided to assist Independent schools and their Boards to consider the context and outlook for their school communities as part of their decision making and planning processes.

Parameters used in this Guide are:

Consumer Price Index (CPI)

The Consumer Price Index is the most comprehensive measure of goods and services price inflation faced by all consumer households. Information provided on CPI includes a breakdown of the CPI Education index, by state and territory and level of education.

Wage Price Index (WPI)

The Wage Price Index measures changes in the price of labour in the Australian labour market. Information provided includes a breakdown of the Education component of WPI, by state and territory and public sector and private sector.

Producer Price Index (PPI)

The Producer Price Index measures inflation of products either as they leave the place of production or as they enter the production process. The PPI Non-Residential Building Construction (which measures changes in prices of selected materials used in construction and wage costs over a 12-month period) is the metric used by the Australian Government Department of Education to determine Commonwealth capital funding for non-government schools.

ACARA National Report on Schooling data portal

The National Report on Schooling in Australia data portal, created by ACARA, provides public access to several national data sets for schooling relevant to the annual National Report on Schooling in Australia.

Information provided includes teaching and non-teaching staff salaries, parent fees/charges and trends in per student debt levels. All information is displayed as either 'per staff' or 'per student'.

Enrolment Growth Trends in Independent Schools

ABS Schools Australia data provides enrolment growth by state and territory including by primary and secondary and FTE staff growth.

Labour Force Survey: Unemployment rate, underemployment rate

The Labour Force Survey is a monthly survey conducted by the Australian Bureau of Statistics. Estimates of employment, unemployment, unemployment rate, and labour force participation rate are published monthly in ABS's Labour Force Australia publication.

Consumer Confidence Index

The Consumer Confidence Index from the Organisation for Economic Co-operation and Development (OECD) measures the change in the level of consumer confidence in economic activity, based upon survey answers regarding their expected financial situation, their sentiment about the general economic situation, unemployment, and capability of savings.

Reserve Bank of Australia Cash Rate Target

The cash rate target for the Reserve Bank of Australia (RBA) is the desired interest rate level in the Australian financial system, influencing borrowing costs and economic activity.

Further information on these indices is provided in the Appendix.

CONSUMER PRICE INDEX

APPENDIX

A1.1 SUMMARY OF METRICS

A1.1.1 CONSUMER PRICE INDEX (CPI)

The Consumer Price Index is the most comprehensive measure of goods and services price inflation faced by all consumer households. The education (Preschool, Primary and Secondary) component of CPI is comprised of all expenditure on school services: school fees and other fees which are associated with attending the school such as book fees, payments from school excursions, and fees for swimming lessons. More information on CPI and access to downloadable data is available at

<https://www.abs.gov.au/statistics/detailed-methodology-information/concepts-sources-methods/consumer-price-index-concepts-sources-and-methods/2018>

<https://www.abs.gov.au/statistics/economy/price-indexes-and-inflation/consumer-price-index-australia/latest-release>

The following CPI measures have been used:

- CPI (All Groups) by Australia, Capital Cities
- CPI (Education) by Australia, Capital Cities
- CPI (Preschool & Primary Education) by Australia, Capital Cities
- CPI (Secondary Education) by Australia, Capital Cities

Time periods used: Final published quarter of each year vs same quarter prior year.

Please note that CPI figures for primary and secondary education are typically updated once per year in the March quarter.

A1.1.2 WAGE PRICE INDEX (WPI)

The Wage Price Index measures changes in the price of labour in the Australian labour market. More information on WPI and access to downloadable data is available at

<https://www.abs.gov.au/articles/frequently-asked-questions-faqs-about-wage-price-index>

<https://www.abs.gov.au/statistics/economy/price-indexes-and-inflation/wage-price-index-australia/latest-release>

The following WPI measures have been used:

- WPI (All Groups, Private sector) by Australia, State/Territory
- WPI (Education, Private sector) by Australia
- WPI (Education, Public sector) by Australia
- WPI (Education, Public and Private sector) by Australia

Time periods used: Final published quarter of each year vs same quarter prior year.

A1.1.3 PRODUCER PRICE INDEX (PPI)

The Producer Price Index measures inflation of products either as they leave the place of production or as they enter the production process. More information on PPI and access to downloadable data is available at

<https://www.abs.gov.au/statistics/economy/price-indexes-and-inflation/producer-price-indexes-australia/latest-release>

The following PPI measures have been used:

- PPI (Non-residential building construction) by Australia and state and territory

Time periods used: December quarter of each year vs same quarter prior year.

The PPI (Non-residential building construction) is the metric used by the Australian Government Department of Education to determine Commonwealth capital funding for non-Government schools.

A1.1.4 ACARA NATIONAL REPORT ON SCHOOLING DATA PORTAL

The Australian Curriculum, Assessment and Reporting Authority (ACARA) is the independent statutory authority responsible for the development of a national curriculum, a national assessment program, and national data collection and reporting program that supports learning for Australian students.

The National Report on Schooling in Australia data portal provides access to several national data sets for schooling relevant to the annual National Report on Schooling in Australia and is available at

<https://www.acara.edu.au/reporting/national-report-on-schooling-in-australia/national-report-on-schooling-in-australia-data-portal>

The following measures have been used from the data portal:

- Teaching staff salaries (Non-Government sector)
- Non-teaching staff salaries (Non-Government sector)
- School parent fees and charges (Independent sector)
- Loans at the end of the year (Independent sector)

Data for these measures are publicly available at the following link

<https://www.acara.edu.au/reporting/national-report-on-schooling-in-australia/school-income>

<https://www.acara.edu.au/reporting/national-report-on-schooling-in-australia/school-expenditure>

Note that the Schools Australia dataset assigns independent Catholic schools to the Catholic sector.

A1.1.5 SCHOOLS AUSTRALIA – AUSTRALIAN BUREAU OF STATISTICS

The Schools, Australia dataset is an annual release containing statistics on students and schools, and the staff involved in the provision or administration of school education. It includes the government and non-government school populations for all Australian states and territories.

Data used in the compilation of these statistics are sourced from the National Schools Statistics Collection (NSSC) (non-finance), which is a joint undertaking between state and territory government

departments on education, the Australian Government Department of Education, and the Australian Bureau of Statistics (ABS).

An explanation of ABS Schools, Australia and data is available at

<https://www.abs.gov.au/statistics/people/education/schools/latest-release>

The following information has been used from ABS Schools Australia:

- Full-time equivalent Independent students by Total Students, Primary, Secondary (data table 43a)
- Full-time equivalent Independent staff (data table 51a)

Please note that the Schools Australia dataset assigns independent Catholic schools to the Catholic sector.

A1.1.6 LABOUR FORCE AUSTRALIA – AUSTRALIAN BUREAU OF STATISTICS

The Labour Force Survey is a monthly survey conducted by the Australian Bureau of Statistics. Estimates of employment, unemployment, unemployment rate and labour force participation rate are published each month in ABS's Labour Force Australia publication.

The following information has been used from Labour Force Australia:

- Unemployment rate by Australia, State/Territory (data table 12 and 12a)
- Underemployment rate by Australia, State/Territory (data table 23 and 23a)

An explanation of Labour Force Australia and data is available at

<https://www.abs.gov.au/statistics/labour/employment-and-unemployment/labour-force-australia/latest-release>

A detailed explanation of unemployment is available at

<https://www.abs.gov.au/statistics/detailed-methodology-information/concepts-sources-methods/labour-statistics-concepts-sources-and-methods/2023/concepts-and-sources/unemployment>

A detailed explanation of underemployment is available at

<https://www.abs.gov.au/statistics/detailed-methodology-information/concepts-sources-methods/labour-statistics-concepts-sources-and-methods/2023/concepts-and-sources/underutilised-labour>

A1.1.7 CONSUMER CONFIDENCE INDEX - OECD

The Consumer Confidence Index measures the change in the level of consumer confidence in economic activity, based upon answers regarding their expected financial situation, their sentiment about the general economic situation, unemployment, and capability of savings.

A score above 100 indicates optimism outweighs pessimism, below 100 indicates pessimism outweighs optimism. The consumer confidence index is based on the premise that if consumers are optimistic, they will spend more and stimulate the economy but if they are pessimistic there may be a greater tendency to save more and consume less.

An explanation of the consumer confidence index and data is available at

<https://data.oecd.org/leadind/consumer-confidence-index-cci.htm>

A1.1.8 RESERVE BANK OF AUSTRALIA'S CASH RATE TARGET

The cash rate target for the Reserve Bank of Australia (RBA) refers to the desired level of interest rates in the Australian financial system. It represents the rate at which commercial banks lend or borrow funds on an overnight basis to meet their daily cash requirements. The RBA sets this target by adjusting the cash rate, which serves as a benchmark for other interest rates in the economy, influencing borrowing costs and ultimately impacting economic activity and inflation.

Cash Target Rate data can be found available online at

<https://www.rba.gov.au/statistics/cash-rate/>

A1.2 REVISIONS FROM THE PREVIOUS REPORT

September 2024 Edition

- Consumer Price Index figures updated to September 2024 quarter (released by ABS on 30 October 2024)
- Wage Price Index figures updated to September 2024 quarter (released by ABS on 13 November 2024)
- Producer Price Index figures updated to September 2024 quarter (released by ABS on 1 November 2024)
- Labour Force, Australia figures updated to November 2024 (released by ABS on 12 December 2024)
- Consumer Confidence Index figures updated to November 2024 (released by OECD, accessed on 13 December 2024)
- Cash Rate Target updated to December 2024 (released by RBA on 11 December 2024)
- School fees, loans and staff salary figures updated to 2022 (released by ACARA in Feb 2024)
